## CHURCH NOTICES

**ST. PETERS EPISCOPAL CHURCH.**—Rev. H. L. Foote, Pastor. Services to day, morning and evening.

**PRESBYTERIAN CHURCH.**—Rev. Josiah McClain will preach in the Presbyterian Church to-day, morning and evening, at the usual hours.

**M. E. CHURCH.**—J. D. Hammond, Pastor. Services to-day at 11 A. M., and 7 P. M. Sabbath School at 3 P. M. Seats free. All are invited. Subjects of discourse: Morning, SOMETHING TO EAT. In the evening there will be a special "Song Service."

We are indebted to State Superintendent Kelly for the following apportionment of school moneys, issued from his office yesterday: Department of Public Instruction, Carson, Jan. 12, 1877.—To School Superintendents and Fiscal Officers of the State of Nevada: You are hereby notified that in accordance with the provisions of the amended school law, I have this day apportioned the sum of twenty-five thousand one hundred and seventy-five and forty-one one-hundredths dollars (\$25,175.41), among the several counties of this State, upon the basis of the school census report for the year ending August 31, 1876, as per the following abstract of apportionment: Abstract of the first semi-annual apportionment of school moneys for 1877, at the rate of \$2,970.515—per census child: Churchill, number of children between 6 and 13 years of age, 56, \$166.35; Douglas, 261, \$775.31; Elko, 608, \$1,806.08; Esmeralda, 201, \$597.07; Eureka, 393, \$1,167.41; Humboldt, 424, \$1,259.50; Lander, 372, \$1,103.03; Lincoln, 615, \$1,826.87; Lyon, 383, \$1,137.71; Nye, 201, \$597.07; Ormsby, 835, \$2,483.35; Storey, 3,002, \$8,917.50; Washoe, 795, \$2,361.66; White Pine, 328, \$974.33. Total children, 8,475. Total amount, \$25,175.41.

By reference to our death notices it will be seen that Mrs. Lois Augusta wife of Francisco Butler, died on last Wednesday in Los Angeles, and was buried on the following day. This lady was one of more than ordinary attainments, and left Carson about six years ago. She was buried from the Episcopal church.

The lodging house people and the saloon and hotel keepers will do a good business while the Legislature is in session, but that time will end now in about six weeks, and then everything will be quiet for two years more.

CALIFORNIA is down to 39%, and everywhere the weeping and wailing of stock dealers is heard.

Our neighbor of the evening paper across the way says the meeting of the County Commissioners, yesterday, was an informal one. At a former meeting the Commissioners adjourned to meet again yesterday. The Appeal and the Tribune were notified to present bids for the county printing to be opened and acted upon at that meeting, and the two offices responded. The bid of the Tribune was for only a portion of the printing, and even for that, in no single item less than the bid by the Appeal. Wherein, then, is there any ground for the charge of "snap judgment," "outrage," "favoritism," and the like? Does it, in the estimation of our amiable neighbor, consist in the fact that the printing for the county was not taken from this office, when no lower bid than our own was received for doing any of the work; and no bid at all received from any other party for any portion of the job printing? We have good authority for stating that both parties were notified to bid for all the county printing.

The Louisiana imbroglio was repeated last evening in the city of Carson. It was in connection with the Third House of the Legislature, but fortunately no battle nor bloodshed was the result. The Packard wing of the House had possession of the District Court room and jail, and the adherents of the Nichols government had possession of the Capitol and the neighboring saloons. The police and militia were out in strong array, and the excitement ran high on the streets. Ever now and then the Packard government received accessions from the outside, and at latest accounts the Governor was giving his inaugural to the people. President Grant as yet has not recognized either party, and consequently but doing is still rife in our midst.

It is said that the Chinamen who pick up the old cigar stumps about the streets and saloons send the same back to San Francisco where they are re-worked into pure Havana cigars. This story is akin to that one told about our wines imported from France. In that country they have what they call wine baths, and after a barrel of the fluid has served for a bath for a dozen or more Frenchmen, then it is bottled up and sent to America under the name of extra imported wine.

OLD WINNEMOGA, the Chief of the Pinites, is still said to be "straight as an Indian," with only a few gray hairs among his raven locks. This old chief has had a chequered life since his birth, and twenty years ago was reckoned one of the most powerful warriors of the day. But time has done its work with him as well as the others of his tribe, and before many decades this world which knows them now will know them no more forever.

THE Senatorial contested case in Elko has been occupying the attention of the proper authorities, and the testimony is now on its way to Carson. Cohn is contesting the seat of Stone on the ground that the latter was a postmaster when elected. It seems to us that this case was plainly decided by the people when Stone was elected by a considerable majority.

By reference to our advertising columns it will be seen that Dr. Fox has concluded to settle in our midst, and in the future lend his services to the aid of the sick in Carson. The Doctor has been a successful practitioner for a long time elsewhere in Nevada, and in addition to a thorough knowledge of the medical art he brings to his aid the experience and judgment of years.

The question about the clock up in Fox's window is, "What swings the pendulum?" The figure of a woman holds one end of the same in the hand, but where the motive power is no one knows. The pendulum swings as everybody can see, the clock keeps accurate time, but there is a mystery about the works which the initiated alone can explain.

A somewhat serious accident happened to Mr. Turner of the firm of Maish & Turner, yesterday morning. He was struck in some way with a hatchet in the point of the elbow, and a terrible gash made. The patient bled profusely at the time, but was doing well at latest accounts.

THE Jubilee Singers are making a second tour of the Pacific Coast and will be in Carson sometime in the near future. They call themselves the original Tennessee Singers, and if there is no fraud in the name an excellent concert may be expected.

THE business men of Carson as well as those of the other towns in the State are complaining of the hard times. How soon the strike of a Comstock ledge in the North Carson mine would dispel this complaint and send business and spirits away up together!

THE aggregate age of the members of the Nevada Senate is one thousand and twenty-six years. Were this the age of one man he would be older than Methuselah, and his birth would date away back in the ninth century or thereabouts.

COMMUNION services will be held this morning at 11 o'clock in the Presbyterian church. This evening a sermon will be preached to young men by the Pastor, and strangers and others are respectfully invited to attend.

THE Gold Hill News says it is a good time to pray now, for the unfortunates of the Comstock are wrapped in gloom, and life has lost its savor.

TRAVEL over the Central Pacific railroad is exceeding light at present. The through passenger trains average but few passengers daily.

LARKIN is said to still cherish a belief that he will not hang. While there is life there is hope.

MR. CHAR. W. FRIEND has gone to Auburn, California, to attend the funeral of his father.

A MEETING was held yesterday by the County Commissioners. They will in the near future advertise for bids for supplying medicine and medical attendance to the indigent sick of the county for the next year, beginning with the first of next month; and they will receive the same from any physician having the requisite diploma and experience. They will also receive bids for the board and care of the patients.

This is the way one of our exchanges puts it in regard to the future of the Consolidated: Let us hope that the genius of Mackay, the watchfulness of Fair, the close calculation of Flood and the easy nonchalance of O'Brien will speedily bring forth new dividends to gladden the hearts and weigh down the pockets of stockholders. Amen!

THE Bienvenu reception, we are informed, will not be held at the usual time this month. Too much dancing even by the Bienvenus is not enjoyed, and a private party is on the tapis for next week.

A melancholy list—the stock list.

## MATTERS IN ALPINE COUNTY.

HOPE VALLEY, Jan. 10, 77.

EDITOR APPEAL: When are we going to have a storm is the cry of everybody in this country. If we do not get snow soon in the mountains it will be rough on the people up in Alpine to run the river next spring. There is not any snow up this way only on the mountain tops, and very little there. We have not had but ten inches of snow this season and that fell on the 28th and 29th of October, but it did not last long. We had a light shower of rain on the 13th of December, the day after the earthquake. It was the heaviest shock ever felt in these mountains. It was about 8 o'clock on the night of the 12th. I am living in a large two-story log house and was sitting at the table reading when the first shock came. I thought it was a heavy gust of wind. I was out a few moments before and the sky was clear. I stepped to the door to see what was up when the second shock came which was heavier than the first. It made the logs in the house creak. Then I took the middle of the road, fearing the house would fall down. We had four distinct shocks, but the second one was the heaviest; it made a noise like distant thunder. It came from the southwest and passed northeast. It made the mountains ring for two or three minutes. Mr. Barnes came down here in the morning. He is mining up near the summit; said that he thought the day of hellaluggerum had come. Mr. Merrill, who keeps store at Woodford's, said it shook things up in the store worse than any that he ever felt. I was expecting to hear of San Francisco being destroyed, but it seems that Alpine is the only place that felt it. They felt it at Markleville and Diamond Valley. I think there must be a little hell under it; there is a big one on top.

On New Year's day I caught the largest golden-headed eagle, in a steel trap, that I ever saw. He measures seven feet six inches from tip to tip. I took him out of the trap and have got him caged, and am going to try to tame him. My partner, M. F. S. Frost, went to the traps next day and in the same trap was her mate. The one that he found was the largest. It had its leg pretty badly cut in the trap, and returned it loose, but it could not be satisfied with that it went down in the valley two miles, where we had some poison, and took a dose and did not raise again. It measured eight feet from tip to tip. I have saved his wings and feet. The wings measure three feet four inches, and the talons eight inches, when spread out, from the tip of one claw to the other. Who can beat this for eagles? We had a very lively race after a fox last Friday, with a trap attached to his foot. He got into the trap on Christmas night and broke the chain that it was fastened with, and started off with the trap. We went out as usual in the morning to look after our traps, but lo, and behold this one was gone. The ground was frozen and we went about a mile before we found any track of it. Finally we found the track and followed it a few rods and lost it again. Then we gave it up as lost. But last Friday as we were going out to look after our traps, we found his fresh track where he had been the night previous. It was about four miles from where he got into it, and had it on his foot 11 days. It is a No. 3 steel trap, weighs 3 1/2 pounds, and did not have any clog, so we thought we could play hounds and overhaul him soon. So away started Reynard and the hounds. It was early in the morning, and we traveled pretty lively. We had not gone more than half a mile before we got sight of him going up a steep mountain that

is known as Thompson's Peak, between Hope Valley and Lake Valley. He went nearly to the top of it, and then turned and went down part way and then went westward along the side of the mountain to a little lake, and crossed and started up a very steep mountain on the south, and got pretty near to the top of that when his foot came off, and he left it, with the trap, and went on his way rejoicing. We got in sight of him several times, but could not catch him. The distance that he traveled that day was about twelve miles, with that trap, over terrible rocky ravines, and through thick brush. It looks almost impossible that a little animal like that could stand it.

The weather now is pleasant but it was last August, the nights are pretty cold, but the days are warm and pleasant. The mercury ranges from 4 to 16 degrees above zero in the morning at daylight, and at noon from 40 to 60 in the shade. The ground is as dry as it was last Summer. Who ever saw such weather? There are Indians at Woodford's that have lived there, according to their count, over 60 years, and ask them if they ever saw such a winter, and they say no see 'um, bin bi Injun al heap di. It looks favorable for the white man all the same. I have kept a journal of the weather for the last five winters and I was comparing notes. In '72, five years ago to-day, the snow was ten feet deep here; '73, four feet; '74, five feet; '75, two feet; '76, twelve feet, and '77, six; quite a contrast. I would suggest that your honorable Legislative body should offer up a prayer, anyway, to the weather clerk to send us a bountiful supply of snow, and have the Hon. Joe. Beer take the lead. I have not been very successful trapping this season on account of no snow. The game gets enough to eat without taking the chances on a steel trap. However, it is a pretty good season for eagles.

Christmas and New Year's passed off very pleasantly in the county. They had a Christmas Tree at Markleville, and a dance; and New Year's they gathered in at Woodford's and had a social party. Matrimony is all the go around Woodford's now. One of our fair young damsels passed off into that state called matrimony commencing a new year, and I understood another was going last Sunday night. W. P. Merrill, the merchant at Woodford's, has started a branch store at Sheridan, and is doing a good business.

There has been quite an excitement about some quartz mines that have been struck lately about five miles southeast of Woodford's. It is near the east fork of the Carson river. It is gold and silver. There has been placer mining done on the river and gulches years ago, that paid small wages. The ground is claimed and staked for several miles on the extensions. I hear that they are going to work sinking on the original claim. I hope they will strike it. So mote it be.

## MOUNTAINEER.

## JUST RECEIVED.

Margarita, De Villan, La Oportuna, Bonquet Especial, Rock, Y. Ca., Bonquet Principas, Elaguala Del. The above brands of fine imported cigars just arrived at Fred Campbell's cigar stand, nice and fresh. Call and try them. jfw
